Start by changing language, if needed

LOG IN

eduID is easier and safer login.

Create an eduID and connect it to your identity to gain access to services and organisations related to higher education.

eduID is easier for you because you only have to remember one password and safer for the Universities because it is connected to a real individual.

CREATE YOUR EDUID

If you already have eduID you can log in [here](#).

You can read more about eduID at [Sunet](#)

Click "CREATE YOUR EDUID"

Register your email address to create your eduID.

Once you have created an eduID you will be able to log in and connect it to your identity.

The following generally applies:

- that all usage of user accounts follow the laws and by-laws of Sweden,
- that all personal information that you provide, such as name and contact information shall be truthful,
- that user accounts, password, security keys and codes are individual and shall only be used by the intended individual,
- that SUNET's ethical rules regulate the "other" usage.

SUNET judges unethical behaviour to be when someone:

- attempts to gain access to network resources that they do not have the right to
- attempts to conceal their user identity
- attempts to interfere or disrupt the intended usage of the network
- clearly wastes available resources (personnel, hardware or software)
- attempts to disrupt or destroy computer-based information
- infringes on the privacy of others
- attempts to insult or offend others

Any person found violating or suspected of violating these rules can be disabled from edulD.se for investigation. Furthermore, legal action may be taken.

Your identity verification progress

! **Your identity is not verified.**
Please see the recommended actions below.

Recommended actions for you

To get the most out of eduID we recommend that you follow the below recommendations.

- Add your phone number
- Verify your identity**
- Add your security key

Your identity is not verified. Please verify your identity to get access to more services.

[Go to Identity](#)

Proceed to verify your identity under Identity in the drop down menu in the top right corner

Start / Identity

Connect your identity to your eduID

Some services need to know your real life identity. Connect your identity to your eduID to get the most benefit from

Choose your principal identification method

- Swedish personal ID number
With a digital ID-card / By post / By phone
- EU citizen
With eIDAS electronic identification
- All other countries
With Svipec ID cryptographic identity verification

SUNET ©2013-2023 [Help Svenska](#)

Choose which alternative is most applicable to you. In this tutorial we chose "EU citizen"

Svenska

Choose your eID country

eduID has requested authentication of your identity using an eID from another country outside of Sweden.

I can not find my eID country

I am a Swedish citizen living abroad, which country should I choose?

Chose your country and continue with following the instructions to verify your identity

You're done!

Basic User Information Form

Before accessing REDCap, we first need to obtain some basic information about you. Please enter ALL the fields below and then hit the Submit button. Once this information is saved, you can change it any time by navigating to the Profile page, which you will find the link to at the top right of every page.

Username: **annaha@ki.se**

First name:

Last name:

Email:

Re-enter email:

NOTE: The email address entered above will first need to be verified before access to REDCap is granted. After clicking the Submit button, an email will be sent to that email account, after which you will need to click the link inside the email to verify your email account before accessing REDCap.

Enter the basic information
regarding your name and
email address

[Log out](#)

✓ Account created / Verification email sent

Your REDCap account has now been created. But to complete the account setup process, you will need to confirm your email address by checking your email account anna-sofia.hallberg.borjesson@ki.se for the account verification email sent by REDCap, and follow its instructions. You will not be able to fully access your REDCap account until the setup process has been completed. Thank you!

 Check your email account anna-sofia.hallberg.borjesson@ki.se

Your account is created
and a verification email is
sent to you.
Follow the instructions in
the email.

✔ Email account verified!

[Log out](#)

Your email account for REDCap has now been verified. You may now access REDCap by clicking the link below.

[Access REDCap](#)

2.

📌 It is recommended that you set up the Google Authenticator app for 2-step login

To use two-step verification to log in to REDCap using Google Authenticator or Microsoft Authenticator mobile app, you will need to first download the app onto your mobile device. Use a link below to download the app on your mobile device.

1) Download the Google Authenticator or Microsoft Authenticator app to your mobile device

Download the app by searching for "Google Authenticator" or "Microsoft Authenticator" in your mobile device's app store (e.g., Apple App Store, Google Play Store).

2) Open the app, and scan this QR code [View QR code in separate window](#)

1.

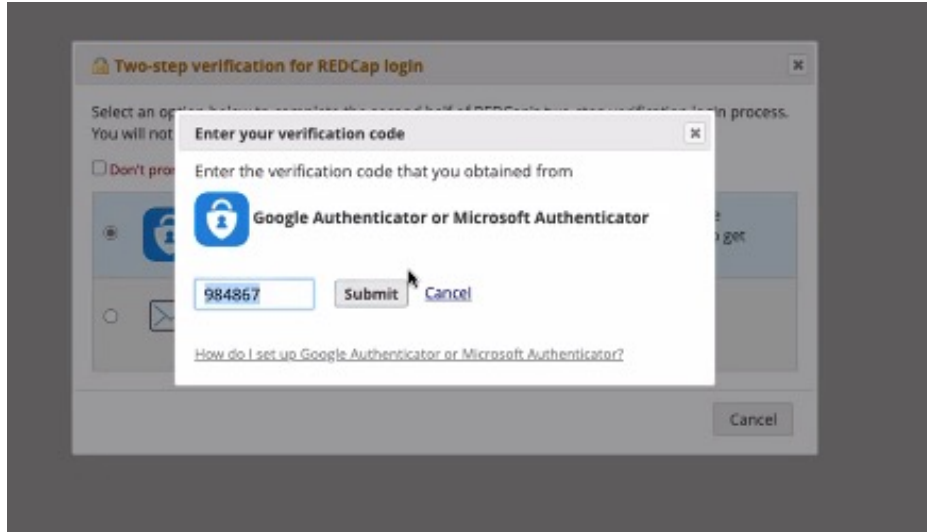

If you're having trouble scanning the QR code, enter the values below into your Google Authenticator app using the Manual Entry method. Also, make sure you set it as Time-based.

Account: `amaha@ki.se@redcap.ki.se`
Key/secret: `EK40TFFWVW77LQW3`

3) Use the app when you log in to REDCap

After you have scanned the QR code using the Google Authenticator or Microsoft Authenticator app, you can open the app at any time in the future to obtain your verification code for REDCap. The verification code is always changing, so it will be different each time you log in. **NOTE: The app does not require an internet connection** on your device in order to work.

REDCap asks for a two step verification. Use Google authenticator or Microsoft authenticator to secure your account. Open the app and scan the QR code on your screen (1). A six digit code emerges allowing you to click Access REDCap (2) and submit it.

Important information to all users:

On the **XX of XXX 2023** (new date tbd) we will enter stage 2 of the **Multi Factor Authentication (MFA)** implementation for logging in to our REDCap server at Karolinska Institutet. This means that after this date **you will no longer be able to obtain your verification code via email**. It is therefore important that you install and activate Google or Microsoft Authenticator App as soon as possible if you haven't done this already.

You should have received an email with detailed information on this, please check your spam filter.

For more **information on MFA and instructions on how to use it**, please see the PDF Set up the Authenticator app for two-step verification in REDCap , where both users with KI-ID and external users can find guides on how to enable the function.

If you have any questions related to this, please contact redcap@ki.se.

Welcome to REDCap!

REDCap is a secure web platform for building and managing online databases and surveys. REDCap's streamlined process for rapidly creating and designing projects offers a vast array of tools that can be tailored to virtually any data collection strategy.

REDCap provides automated export procedures for seamless data downloads to Excel and common statistical packages (SPSS, SAS, Stata, R), as well as a built-in project calendar, a scheduling module, ad hoc reporting tools, and advanced features, such as branching logic, file uploading, and calculated fields.

Learn more about REDCap by watching a [brief summary video \(4 min\)](#). If you would like to view other quick video tutorials of REDCap in action and an overview of its features, please see the [Training Resources](#) page.

NOTICE: If you are collecting data for the purposes of human subjects research, review and approval of the project is required by your Institutional Review Board.

If you require assistance or have any questions about REDCap, please contact [KI REDCap Administrator](#).

REDCap Features

- Build online surveys and databases quickly and securely in your browser** - Create and design your project using a secure login from any device. No extra software required. Access from anywhere, at any time.
- Fast and flexible** - Go from project creation to starting data collection in less than one day. Customizations and changes are possible any time, even after data collection has begun.
- Advanced instrument design features** - Auto-validation, calculated fields, file uploading, branching/skip logic, and survey stop actions.
- e-Consent** - Perform informed consent electronically for participants via survey.
- Diverse and flexible survey distribution options** - Use a list of email addresses or phone numbers for your survey respondents and automatically contact them with personalized messages, and track who has responded. Or create a simple link for an anonymous survey for mass email mailings, to post

Congratulations! You are successfully logged in to REDCap!

Please note! Within the red circle you will find your username at REDCap. Please send an email containing these details to trial@princess2.org
