

Sub Study Stent Thrombosis

Record ID (generated by database)

Angiography / Revascularization

Angiography performed

- Within 24 hours
 During hospital stay
 No

Culprit identified

Yes No

PCI

Yes No

Target vessel

- LM
 LAD
 RCA
 LCX

Antiplatelet therapy

- Clopidogrel
 Ticagrelor
 Prasugrel

Adverse events

New ST elevation

Yes No

Sudden deterioration in ventricular function plus ischemic ECG changes

Yes No

New cardiac arrest or recurrent VT?

Yes No

Unexpected troponin rise

Yes No

Other

Yes No

If other, please explain

Was re-angio performed during hospital stay?

- Yes No

If re-angio was performed, what was the indication(s)

- New ST elevation
 Sudden deterioration in ventricular function plus ischemic ECG changes
 New cardiac arrest or recurrent VT
 Unexpected troponin rise
 Other

Days after primary PCI that re-angio was performed

- 1
 2
 3
 4
 5

Findings of stent thrombosis?

- Yes No
